

Learning That Still Matters Test

Decide whether a learning experience earns human attention.

1. Information access

What can learners already search, watch, ask AI about, read or reference? _____

2. Remaining difficulty

What can they still not do, decide, notice, practise or apply reliably? _____

3. Experience needed

What attempt, comparison, decision or production would make capability visible? _____

4. Feedback needed

What response would improve the next attempt rather than judge this one? _____

5. Human value

What does interaction, trust, expert judgement or social calibration add? _____

6. Workplace evidence

What would show that learning survived contact with real work? _____

Attention-earning sentence

This learning experience still matters because learners need to...
